

Unique manufacturers of Industrial Handling Solutions

Although cranes and hoists began as simple machines that carried up and down materials, today they have evolved into more sophisticated machines that simplify processes in the manufacturing, mining, infrastructure, automotive, power, and construction industries.

Many companies, especially those in manufacturing, mining, and construction have to lift or lower heavy loads at some point during their various processes. With the invention of machines like hoists and cranes, we have greatly reduced the human effort, as well as reduced the process timing, thus increasing the output. Currently, a company based in Nashik is building its reputation as a provider of a 'unique' service in this sector. This company is none other than Unique Industrial Handlers Pvt Ltd.

Unique Industrial Handlers is a company that has been in operation since 1983. The Company was founded by three entrepreneurs; Jetha Tahiliani, (Late) Arjan Vaswani, and Jagdish Badlani, which originated as a manufacturer of small capacity EOT, Goliath, & Semi Goliath cranes. But today, the company has blown away all expectations by being one of India's largest manufacturers of cranes, winches, transfer cars, traversers, drop pit tables and many other material handling equipment. The firm has produced more than a thousand cranes which is the most notable development in the industry!

Amongst its primary clients are Steel Plants, Heavy Engineering Workshops, Thermal, Hydro and Nuclear Power Plants, Railways, Space Programs and Shipyards. One of the crane supplied to ISRO has also been used for Chandrayan project. All designs are made in house and comply with all standard codes and guidelines, including IS, DIN, FEM, American Codes and Nureg. As a result, Unique's cranes have been successfully supplied and commissioned in various parts of the world including Bangladesh, Bhutan, Indonesia, Laos, Libya, Malaysia, Nepal, Russia, Sri Lanka, United Arab Emirates, Vietnam, Yemen, Zambia, etc.

Unique Industrial Handlers is certified under ISO 14001:2015 and has two primary manufacturing facilities based in Nashik; in addition, the company maintains offices in all major metro cities including Mumbai, Delhi, Kolkata, and Chennai.

'Unique' Services include:

- Erection, installation and commissioning of overhead, Goliath/ Gantry cranes
- Overhauling and crane modification for both EOT and Goliath/ Gantry cranes

Special Achievement

As part of the contract with VOITH, Brazil for the Ana Cua Hydro Project in Argentina, Unique has manufactured a 510T Crane for the first time in its history. In the presence of customers' representatives, the crane was tested at the company premises in Gonde, Nasik for load and overload under conditions of 640 tons. This crane is equipped with a PLC system for controlling tandem lifting of rotor and stator assemblies for Hydro Projects.

Commitment to quality:

Unique does a comprehensive quality check at all stages of the production process, from procurement, to fabrication, to machining, to sub-assembly, to termination of the production line. Thus, the Company has been supplying cranes with a capacity of up to 300 tons successfully for handling turbine components at various thermal and hydro power plants, as well. When handling components such as turbines, generators, or other heavy components, these cranes can work together in tandem. Unique Industrial Handlers has supplied cranes conforming to Nureg specifications for Nuclear Power Stations over the past few years, including a 280-ton single failure proof crane for the BHAVINI project of NPCIL in Kalpakkam. There are a number of locations in India where the Company has supplied a large number of cranes for nuclear power plants.
